Deepwater Horizon Incident, Gulf of Mexico Region 6 REOC Update

Subject: Region 6 Update # 18

Deepwater Horizon Incident, Gulf of Mexico

Date:May 15, 2010To:Incident CommandThru:Planning SectionFrom:Situation Unit

Operational Period: May 14, 2010 2401 – May 14, 2010 2400 **Reporting Period:** May 14, 2010 2401 – May 15, 2010 1300

1. Background

Site Name: Deepwater Horizon Incident FPN#: N10036

Mobilization Date: 4/27/2010 Start Date: 4/28/2010

2. Current Situation

- Incident Status Summary as reported by NOAA for 5/13:
 - Total response vessels: 559
 - Containment boom deployed: over 1.2 million feet
 - Containment boom available: over 300,000 feet
 - Sorbent boom deployed: over 385,000 feet
 - Sorbent boom available: over 870,000 feet
 - Boom deployed: over 1.5 million feet (regular plus sorbent and fire boom)
 - Boom available: over 1 million feet (regular plus sorbent and fire boom)
 - Oily water recovered: more than 6 million gallons
 - Dispersant used: over 517,000 gallons
 - Dispersant available: more than 250,000 gallons
 - Overall personnel responding: more than 17,000.

2.1 (USCG) Incident Command Post (Houma, LA)

- EPA finalized request for sampling of oil/dispersant by BP contractors for analysis to EPA Houston lab.
- EPA coordinated with federal partners and BP representatives regarding monitoring/sampling of surface and subsurface dispersant impacts to ensure all parties are aware of all activities.
- EPA gathered and coordinated sampling plans from other unified command agencies to incorporate into comprehensive sampling tracking spreadsheet.
- EPA participated on conference call with HQ, R4, and R6 on waste management issues. EPA continued coordination with BP waste representatives on the BP waste plan.
- EPA ERT submitted their final air sampling plan to Unified Command for approval.
- Deepwater dispersant application began on 5/15 at about 0300 hours. Application will continue until 1130 at which time BP will try a new attempt to insert a spear into the riser.
- No in-situ burn operations will happen on 5/15 because of unfavorable weather (heavy rain). Burns will be attempted on 5/16.
- BP dispersant team has indicated the possibility of using a dispersant trade name Sea-Brat #4. (Reference: http://www.alabastercorp.com/seabrat.htm)
- BP SCAT teams report a total of 27 miles of shoreline as "oiled" with one (1) mile considered "heavy oiled".

2.2 (USCG) Area Command Post (Robert, LA)

• The Area Command Environmental Unit leadership continues to coordinate overall strategies for monitoring subsurface dispersed oil plumes.

2.3 Air Monitoring/Sampling

- EPA continues to conduct air monitoring and sampling in Venice operations area (VOCs and Particulates):
 - o Venice, LA 29.25274 N, 89.35750 W V02;
 - o Boothville, LA 29.31449 N, 89.38433 W V03;
 - o Fort Jackson, LA 29.35699 N, 89.45487 W V05.
- EPA continues to conduct air monitoring and sampling in Chalmette operations area (VOCs and Particulates):
 - o Poydras, LA 29.86609, -89.89108 C02 located at Fire Station number 8;
 - \circ Chalmette, LA 29.96082, -90.00132 C04 located at FireStation on Aycock St.
 - o Hopedale, LA, 29.84049, -89.68980 C05 located at Fire Station number 11.

Each air monitoring location has 5 pieces of air equipment:

- DataRAM monitoring particulate matter PM10 (Serve as back-ups to EBAMs);
- EBAM (Particulate Monitors)-equipment will replace DataRAM's;
- o AreaRae/MultiRae monitoring VOCs;
- o PQ200 samples for PM2.5;
- o SUMMA Canisters per location sample for VOCs.
- All air monitoring/sampling stations are monitored throughout the day (24 hours) for immediate reporting of any elevated VOC or particulate levels. The maximum reading is reported to the OSC at Area Command Post in Venice and Chalmette.
- Real-time air monitoring data from midnight to midnight each day is reviewed for field QA and uploaded into SCRIBE by 1200 each day and available to EPA Headquarters.
- Venice air operations reported action level exceedences for H2S (0.5 ppm) at locations V02 and V03. The highest reported H2S level at station V02 is 0.7 ppm and at station V03 is 0.8 ppm.

EPA summary of air monitoring/sampling activities:

Air Monitoring & Samples	DataRAM (PM10)	AreaRae	SUMMA Canisters	PM2.5	TOTALS FOR 5/12
Venice	3 locs/24-hr	3 locs/24-hr	9	3	12
Chalmette	2 locs/24-hr	3 locs/24-hr	6	3	9
TOTAL TO DATE	6 locs/24-hr	6 locs/24-hr	203	84	

^{*}QAQC samples not included in sample count

2.4 Water/Sediment Sampling

- EPA continues to conduct water and sediment sampling at locations provided by EPA Headquarters and selected through National Coastline Condition Assessment (NCCA) program. The NCCA sample locations are sampled every four years by state agencies with U.S. Coastlines. Sample parameters and locations were also selected in coordination with the EPA Region 6 Water Quality Division.
- Representatives from the Water Division and the REOC Environmental Units from R6 and R4 conduct a conference call three times a week with the HQ EOC to discuss the coordination and consistency of water and sediment sampling across the Deepwater Horizon Incident Response.
- On 5/14, Venice water operations were not conducted due to poor weather conditions. Water operations are planned for 5/15 weather conditions permitting.
- On 5/14, Chalmette water operations were deployed from Coco Marina in Cocodrie, LA, and travel west to collect samples from pre-identified locations. No oiled wildlife observed, no oil odors detected, and no visual oil sightings. Water operations are planned for 5/15 weather conditions permitting.

EPA summary of water/sediment activities:

Water/Sediment Samples	Water	Sediment	TOTALS FOR 5/12
Venice	0	0	0
Chalmette	6	6	12
TOTAL TO DATE	75	67	

^{*}QAQC samples not included in sample count

2.5 TAGA

• TAGA 1553 is on standby and is planned to conduct monitoring beginning on 5/17.

2.6 ASPECT

- On 5/14, no ASPECT missions were flown.
- ASPECT is on station in Gulfport, MS as of 1530 on 5/14. A short flight was conducted to test all systems in preparation for possible burn operations on 5/15, and all systems are operational. ASPECT is coordinating flight plans with Incident Command in Houma, LA.

2.7 Water Quality Protection Division Update

· Water Quality Protection Division situation update is attached.

3. EPA Assets

3.1 Current Assets Deployed

- · Activated in Dallas, TX
 - REOC activated
 - · SRICT activated
 - · RRT activated

Deployed Personnel

	Dallas, TX	Venice, LA	Robert, LA	Houma, LA	New Orleans, LA	Chalmette, LA	Slidell, LA
